QUASR BV

Cookie Policy

Last revised: November 2026 https://www.quasr.io/legal/cookie/202611

This Cookie Policy explains how Quasr BV (“Quasr”, “we”, “us” and “our”) uses cookies and similar technologies when you visit our websites at https://www.quasr.io and https://docs.quasr.io (“Websites”), and when you use the Quasr apps to log in and to manage your account and tenants: the Login UI, the Account UI and the Admin UI (“Apps”).

In short

- Our Websites and Apps don’t use cookies.
- We don’t use advertising, social media or other tracking technologies, such as tracking pixels, web beacons or fingerprinting.
- To count visits, and clicks on links and downloads, on our marketing website, we use Plausible Analytics. It doesn’t use cookies, doesn’t store anything on your device (except your opt-out, if you choose it) and doesn’t follow you across websites.
- Our Websites don’t load any content from third parties, so no third party can set cookies or track you through them. Our analytics are part of our own website and send their statistics through our own domain.
- The Apps only use your browser’s storage for what is strictly necessary to log you in, and, like the documentation website, to remember the preferences and choices you make. This information isn’t shared with third parties and isn’t used to track you.

Because we don’t use cookies, our Websites and Apps don’t show a cookie banner.

What are cookies and similar technologies?

Cookies are small data files that are placed on your computer or mobile device when you visit a website. Cookies are widely used by website owners in order to make their

websites work, or to work more efficiently, as well as to provide reporting information. Cookies are sent back to the website with every request.

Browsers also offer similar technologies to store information on your device, such as local storage and session storage ("browser storage"). Unlike cookies, information in browser storage isn't sent automatically with every request: only the website's own code can read it, for example to send your session to our API. Session storage is deleted when you close the browser tab; local storage remains until it is deleted by the website or by you.

Which technologies do we use?

Websites

Our marketing website (https://www.quasr.io) doesn't use cookies. It uses Plausible Analytics to count visits, and clicks on links and downloads, as described in our Privacy Policy. If you don't want your visits to be counted, you can opt out on our website analytics page. We then save your choice in your browser's local storage; otherwise, the marketing website doesn't store anything in your browser.

Name	Type	Duration	Purpose
plausible_ignore	Local storage	Until you opt in again or delete it	Only stored at your request, when you opt out of our analytics: remembers that your visits must not be counted.

Our documentation website (https://docs.quasr.io) doesn't use cookies. It uses browser storage only to remember your display preferences. These preferences aren't strictly necessary: they save you from choosing them again, and the website works the same without them.

Name	Type	Duration	Purpose
theme	Session storage	Until you close the browser tab	Remembers whether you chose the light or dark theme.

Name	Type	Duration	Purpose
page_size	Local storage	Until you delete it	Remembers how many rows per page you chose for tables.

Apps

The Apps don’t use cookies. They use browser storage to log you in securely and to keep you logged in, and to remember the preferences and choices you make. The names start with the identifier of the tenant you log in to (e.g. `<tenant>#SESSION`).

Strictly necessary

Without this information, you can’t log in to the Apps.

Name	App	Type	Duration	Purpose
SESSION, ACCOUNT, EXPIRATION	All Apps	Local storage	Until you log out, or until the App removes it after your session has expired	Keeps you logged in: your session, your account identifier and when the session expires.
SCORE, INTERNAL	Login UI	Local storage	Until you log out, or until the App removes it after your session has expired	The authentication score of your session, and whether your account is an internal or an external account.
REQUEST, PROVIDER, PROVIDER_INTERNAL	Login UI	Local storage	Until the login is completed or cancelled, or replaced by your next login	Keeps track of a login in progress: the request of the application that sent you to the login page, and the external identity provider you log in with.

Name	App	Type	Duration	Purpose
MODE	Login UI	Session storage	Until you close the browser tab	The type of login the application asked for (internal or external accounts).
NONCE, CODE_VERIFIER	Account UI, Admin UI	Session storage	Until the login is completed, or you close the browser tab	Protects the login against interception and replay (OpenID Connect nonce and PKCE code verifier).

Preferences

This information isn't strictly necessary: it saves you from making the same choices again, and the Apps work the same without it.

Name	App	Type	Duration	Purpose
THEME	All Apps	Session storage	Until you close the browser tab	Remembers whether you chose the light or dark theme.
LANGUAGE	Login UI	Session storage	Until you close the browser tab	Remembers the language you chose.
MODE	Login UI	Local storage	Until you delete it	Remembers whether you last chose to log in or to sign up.
PROVIDER_CHOICES	Login UI	Local storage	Until you delete it	Only when you tick "Remember my choice on this device": remembers, per external identity provider, whether we may use your profile details from that provider, so you aren't asked again.

Name	App	Type	Duration	Purpose
PAGE_SIZE	Account UI, Admin UI	Local storage	Until you delete it	Remembers how many rows per page you chose for tables.

Logging in to our customers' applications

Our customers use the Login UI to let their own users log in to their applications. When you log in to an application of one of our customers, the Login UI uses the browser storage described above, and that customer is responsible for informing you about it in its own privacy or cookie policy.

Third-party services

Our Websites link to third-party services, such as our status page, our trust center, LinkedIn, YouTube and Discord. These services are only loaded when you follow a link to them. They have their own cookie and privacy policies, which we encourage you to review.

When you log in to the Apps with an external identity provider, such as Google, Apple or Microsoft, the Login UI sends you to that provider's login page. That provider may set its own cookies, as described in its cookie and privacy policies.

How can I control cookies and browser storage?

You can delete the information in browser storage at any time, and set your browser to block it, through your browser's settings. As the means to do so vary from browser to browser, you should visit your browser's help menu for more information. If you block browser storage, you can still use our Websites, but you won't be able to log in to the Apps.

How often will you update this Cookie Policy?

We may update this Cookie Policy from time to time in order to reflect, for example, changes to the technologies we use or for other operational, legal or regulatory reasons. Please therefore re-visit this Cookie Policy regularly to stay informed about our use of cookies and related technologies. If we ever start using cookies or technologies that require your consent, we will ask for your consent first.

The date at the top of this Cookie Policy indicates when it was last updated.

Where can I get further information?

For more information on how we process personal data, see our Privacy Policy. If you have any questions about our use of cookies or other technologies, please email us at privacy@quasr.io or by post to:
